DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Yokoyama et al. (U.S. 5,584,556). Yokoyama discloses a surface light source device comprising a light-conducting member consisting of a sheet of transparent material and a linear light source disposed adjacent to an edge surface of the light-conducting member. The light-conducting member has a light emitting front surface 2a with a diffusion plate disposed thereon and a light incident rear surface 2c with a reflecting plate disposed thereon. The light incident rear surface has a pattern of depressions or projections such as that shown in figure 31. See abstract and figures 2-10 for various embodiments. Surface 2c of the light-conducting member is formed using a mold as shown in figure 30.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: ***

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 5 rejected under 35 U.S.C. 103(a) as being unpatentable over Yokoyama et al. (U.S. 5,584,556). The range of area with which to form the small recesses or projections constituting the dots is a result effective variable. Determination of a result effective variable has been judicially deemed to be obvious to those of ordinary skill in the art.

Claim Objections

Claims 6-27 objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only and cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Chung whose telephone number is (703) 306-0155. The examiner can normally be reached on Monday-Friday from 8:30 to 5:00.
